Website Development Company in Lucknow

Fast, secure and conversion-focused websites for businesses in Lucknow, across India and overseas.

Quick Infotech is a **website development company in Lucknow** that designs and builds business websites, e-commerce stores, web applications and custom portals. Our team plans, designs, develops, tests and launches every project in-house, so you deal with one accountable team from the first call to the day your site goes live.

Whether you are a local shop in Hazratganj, a growing manufacturer, a school, a clinic or a startup in Gomti Nagar, we build websites that load fast, look good on every screen and make it easy for customers to contact you or buy from you.

Our Website Development Services

Custom Website Development
Tailor-made websites built around your brand, your customers and your business goals.

Business & Corporate Websites
Professional multi-page websites that build trust and bring in enquiries.

E-Commerce Development
Online stores with product catalogues, secure payment gateways, order tracking and inventory control.

Web Application Development
Dashboards, portals, booking systems and internal tools built to your workflow.

CMS Development
Easy-to-manage websites on WordPress, Laravel and PHP so your team can update content without a developer.

Website Redesign
Modernise an outdated site with better design, speed, mobile layout and structure.

Landing Pages
Focused, high-converting pages for ad campaigns, product launches and lead generation.

Website Maintenance & Support
Updates, security checks, backups, bug fixes and performance monitoring after launch.

Industries We Build Websites For

Retail and e-commerce, manufacturing and wholesale, education and coaching, healthcare and clinics, real estate, hospitality and restaurants, logistics, NGOs, professional services and startups.

What Is Included in Every Website

- Mobile-friendly, responsive design for phones, tablets and desktops
- SEO-friendly structure: clean URLs, meta tags, heading hierarchy, sitemap and schema-ready code
- Fast page loading with optimised images and clean code
- Contact forms, WhatsApp click-to-chat and Google Maps integration

- SSL certificate and essential security settings
- Admin panel to manage pages, blogs, products and enquiries
- Analytics and Search Console setup
- Cross-browser and cross-device testing before launch

Our Development Process

1. Discovery	We understand your business, audience, competitors and goals.
2. Planning & Design	Sitemap, wireframes and visual design shared with you for approval.
3. Development	Clean, secure code built on the technology that suits your project.
4. Testing	Speed, security, forms and device checks before anything goes live.
5. Launch	Domain, hosting and go-live handled end to end.
6. Support	Ongoing maintenance, updates and improvements as your business grows.

Technologies We Work With

PHP, Laravel, WordPress, JavaScript, React, Node.js, MySQL, HTML5, CSS3, Bootstrap, REST APIs and payment gateway integrations.

- Clear scope, timelines and communication at every stage
- Custom builds, not copy-paste templates
- Design, development, SEO and digital marketing under one roof
- Post-launch support so your website keeps performing

Frequently Asked Questions

Which is the best website development company in Lucknow?
The right company is the one that understands your business and can show clear scope, timelines and support. Quick Infotech is a Lucknow-based team offering custom website development, e-commerce, web applications and ongoing maintenance under one roof.

How much does website development cost in Lucknow?
The cost depends on the number of pages, design complexity, features such as payments or logins, and integrations. A simple business website costs far less than an e-commerce store or custom web application. Share your requirements and we will send a clear quote.

How long does it take to build a website?
A standard business website usually takes a few weeks. E-commerce sites and custom web applications take longer depending on features. You get a timeline before work begins.

Will my website be mobile-friendly and SEO-ready?
Yes. Every website is responsive and built with SEO-friendly structure, fast loading and proper meta tags.

Do you provide support after the website goes live?
Yes. We offer maintenance plans covering updates, backups, security checks and fixes.

Can you redesign my existing website?
Yes. We redesign outdated websites for better look, speed, mobile experience and search performance while keeping the content that already works.

Do you build websites for clients outside Lucknow?
Yes. We work with clients across India and overseas, with calls, screen sharing and online approvals.

Planning a website for your business?
Talk to the Quick Infotech team for a free consultation and a clear quote.
